- Video editor/videographer
- Library
- YouTuber/creator
- Refurbish computers
- Fixing computers
- Updating customers websites
- Web development
- Creating servers from scratch
- Becoming a known author
- AUTOCAD

DVD BURNING

You should always keep a copy of anything on a blank DVD disc. It's important to store your documents and whatever else you have on your computer. Always keep a backup copy of any videos/photos or certificates. You will need them later. Everything can be burned to a DVD and you will save yourself from stupid and awful mistakes later on in life. Including Google maps. You can download and save it to a disc and do your part by mailing it to a relative.

GOOGLE MAPS

Google maps has been around for a very long time and it’s a adventure to download and print out a map of a current zip code. I feel as google maps has done it’s best to provide us with important detail as to where and how to locate certain things. Every map is different unless you create it from scratch and do it yourself project. that would be one way of informing your people of locations and where to go to. Example you can design a map of swimming holes or bunkers. Useful icons within the map.

MAPPING LOCATIONS

Mapping locations has been a popular thing on the web and online if you choose this fun option then you are set to give locations to pin point anything on a current map. Bunkers; Swimming holes; Basements. Mostly bunkers are not a thing of the past anymore because of maps give their secret location. This can be googled online and if you choose to follow then good luck. Please be careful when designing your map. You can automatically download a copy.

Downloading icons

Downloading icons is very popular now a days with the web. You can use a search engine to do this and download your favorite icons such as a pool or pin. You can link your maps within your location or just by email or text message. If you find a swimming pool icon then download it and use it on a map. Everything is done online and you can download PDF format files to ADOBE.

BUILDING BUNKERS

You are very educated within a popular thing such as building bunkers and storing coke, food and water so it becomes a popular site to visit or hang out during the months or winter months. You have the knowledge of researching this so you can become a popular success on YouTube and Rumble video sites. It’s your own decision of where you put your underground bunker.

Digital Cameras

Digital cameras are a very popular thing when you take a photo and edit it. Photos are a nice way to have a memory or two. I find that digital cameras are very important and all you have to do is download the photos to your computer and have a copy on your desktop. You can simply copy your digital photos to a blank disc and have a copy for friends and family members.

PHOTOS

You can have a digital copy of all your photos on your computer and print them out. You can also order the photos through different websites such as Walmart, Target. You can also email them to family; and friends because they will have a memory of everything. Photos are a very important part in our life’s and it’s fun to have a memory to look back on.

VIDEO DAIRIES

If you want to keep track of your own projects then art a video Vlog of dairies to keep track of your activities and such. I have seen on YouTube of people keeping a log of videos where they explain how and what they are doing and why in the first place they did it. Example people like to build bunkers and keep their audidence informed. Very day is a new adventure for them. I find it awesome and exciting to keep a log and copy.

VIDEO EDITING

Video editing has become a popular thing over the years and it’s important to choose the right video editing platform for ether MAC or WINDOWS DESKTOP. I find that Capcut video editing platform works for me because it’s a simple process of putting together videos and other stuff. You can also use MOVAVI video editing software to download. I hope you can do this.

LOG

You always want to keep a log of everything you might want for your upcoming projects and design a list. If you design a log page in excel then you are set for anything. If you desire to build an underground thing in the forest then keep a log of stuff that you might need for your upcoming trip. Everything can go smoothly. There is no need to rush and always take a photo or video to keep a copy for yourself.

VIDEO CONTENT

Video content for you or family and friends are very important in life. Video recording is a part of life and you will enjoy every minute of it. I know that I take video but I usually save that for myself or my closet relatives. I can simply share a video and get positive feedback. Vlogs are important as well. Creating Vlogs are the fun part of a video. Everything depends on you or something else you had in mind.

PRIVATE VIDEOS

If you want to make your videos private and not seen by preying eyes then you should just keep a copy for yourself. Try to just keep your video private and try not to post online. Very important stuff. I have a video myself that I keep private. I find that people tend to hack your videos and try to claim that it was theirs in the first place. I am going to advise you to just keep certain videos private and use caution when being online.

AMAZON

Amazon has always been there for me when I needed to order something and have it shipped the next business day and I am very impressed by amazon and it’s quick service. I find that they have everything in stock and will restock a certain item that you really wanted and looking forward to having all by yourself. Seems like amazon is all good with me and my friends. YES I often use a gift card when available. Fun times.

DVD BURNING SOFTWARE

With DVD burning software in stores/online you can simply download a copy and create a bootable DVD or anything else you wish to. DVD burning software still is around and it’s become popular and also windows media player as well. You can copy for photos/videos into DVD burning software program for free without the download. Windows media player does the trick and You will enjoy every bit of it. PDF that’s a different topic.

PDF’s

PDF stands for portable document format to you convert to PDF. Microsoft word and other documents. I have Adobe on my computer and I can actually convert to PDF format. You can convert excel, word, photos & Videos within the program and add links to your document. You can search within the document. Very popular program and software to use on a daily basis. I can add a file and convert it or email it.

UBER

Car riding services are available through the uber app and lyft app. The nice thing about uber is that you can plan ahead to visit a friend or particular place and uber is the best service ever. I enjoy uber because it’s # 1 on my list compared to a taxi service which I disliked back when. Uber will take you anywhere you want to go. Plan ahead of time if needed. Make your trip awesome.

PRIVATE BUNKER

- Soda
- Candy
- Radio/CD Player
- Magazines
- Clothes
- Pants
- Readable books
- Own Map
- Laptop Computer
- Tablet
- Internet
- Email
- Android Cellphone

HERMIT

- Cans of soda or 2 litter bottles.
- Cans of AW root beer
- Music/CDs
- DVD player
- Portable DVD player

- TV
- Soda
- Bottles of Water
- Play station 4 or 5
- Video Games
- Camera
- Your own website
- PC
- Food
- Gift card for groceries
- Shoes

EMERGENCY PLAN

if any situation should occur then you have a plan of action for yourself. If you are on limited living expenses and cannot go anywhere like to a store to get water then ask your neighbor to do this plan of action. This will give you time to prepare and give a gift card to them with the correct amount of money on it to shop at the store. This saves both you and the other person the hassle.

WINTER CLOTHES

- Hooded Sweatshirt
- Wind Pants
- Jacket
- Vest
- Long sleeve polo
- Hat/cap

These are the items you need during the cold winter months come November / December.

CREATE AMAZON WISHLIST

If you create a amazon wish list then your closet family and friends can send you a special package in the mail. You can request that it can be sent to a PO Box address if you are a YouTuber or creator of your own videos and such. Family members and friends can do this by going to the direct website of amazon dot com and start the tradition.

PO BOX ADDRESS

When you have opened a PO box address for yourself then you can request others to send you fan mail to your new address. People use their address because they are video creators and YouTube creators of their own work. I would suggest that fan mail can be exciting and fun. Letters; photos and amazon packages sent to your PO box address from others including family members.

THANKS A BUNCH

Thanks a bunch for reading my newest E Book. Have any suggestions please email me.
